

### i-Bridge Panorama VBS

[www.team-italia.it](http://www.team-italia.it)

**TEAM ITALIA'S I-BRIDGE** Panorama VBS (Virtualised Bridge Solution) controls and manages onboard systems by means of 3D technology, multi-touch controls and joggers, as well as a 4k stretch display, integrated wing, new panoramic visualisation and front windscreen integration. The Italian company says it is focusing strongly on its design and developing ergonomic studies for a range of environments and new applications, and that production is currently running at full pace. Orders have been taken through to 2021.

“With over 500 30m-100m projects already launched, we can confirm our market trend is upward,” says Massimo Minnella, Team Italia CEO. “We’re working on 31 new superyachts this year and already have 42 confirmed orders for production starting in 2019 and 14 for 2020.”

### Dometic Slide-Out Kitchen

[www.dometic.com](http://www.dometic.com)

**THE DOMETIC SLIDE-OUT** Kitchen is a compact unit with three-burner cooktop, sink, benchtop, storage compartments and accessories that can slide-out to the exterior deck for al-fresco dining. The units come in two sizes – 1m and 1.5m – and in a landscape or portrait layout styling. Dometic’s Julien Le Feuvre told *IBI* that the retractable galley is the first launched in the marine industry and that the units have been marinised from a similar product used in Australia by backpacking vehicles. They are made from corrosion-resistant aluminium and stainless steel materials and manufactured completely in Australia.

### Schenker’s Zen watermaker

[www.schenkerwatermakers.com](http://www.schenkerwatermakers.com)

**THE ZEN WATERMAKER** from Schenker is a small, automatic, silent and efficient unit that can be installed both flat or vertical, enabling it to fit almost any boat. Sophisticated 3D modelling allows for optimal integration of each component, eliminating unnecessary parts with the primary objective of achieving the best efficiency and reliability. The basic model produces 30lt per hour of fresh water, consuming just 110W. Both 50lt and 80lt versions are to follow soon.

### SSVC MiPlayer

[www.ssvcmi.com](http://www.ssvcmi.com)

**SERVICE SOUND AND** Vision Corporation’s (SSVC) MiPlayer system is a live broadcasting service that operates over a local WiFi network without the need for internet connectivity. MiPlayer was first developed for the military and disaster relief agencies. It gives access connection to live news, welfare/entertainment and educational services in areas where internet connection may be impossible.
